

# INVITATION

## for presentation of 3D equipment

Respected,

The Centre for the development of the South-East planning region within the project "Business eco-system as an integrated system - Be In" implemented through the Interreg IPA Programme for cross-border cooperation between Greece and Republic of North Macedonia implements activities to support the labor force from the region in terms of developing skills according to the needs of the labor market, encouraging new ideas of small and medium-sized enterprises and future entrepreneurs by developing a package of tools that will contribute to strengthening current capacities and bridging the gap between the existing supply and the required workforce.

Within the framework of the project, the Centre organizes 6 (six) open days during which representatives from educational institutions, the business sector, non-governmental organizations, freelancers, future entrepreneurs and researchers from the South-East region will have the opportunity to learn about the innovations in the design and production processes of various 3D products through the use of 3D printers and scanners.

For this purpose, we invite you to participate in the open days and keep up to date with the new trends for the production of prototypes and finished 3D products and the introduction of innovative technologies in different areas of science in the premises of the Co-working space in the Centre for development of the South-East planning region in Strumica.

With respect,

Centre for development of the South-East planning region
